Subject: Internet Plan Suggestions

At present in Mount Gambier, we can only get ADSL1 via anyone, or ADSL2 via Telstra. I know, that, given the offer of signing up for ADSL2 or even 2+ with anyone else but Telstra would be a blessing, and I would take it up in an instant.

Telstra needs to be forced to share its copper with everyone. In fact, Telstra should be bought back from whoever owns it. It should not have been privatized.

You should not be building a FTTN network, but a FTTH network, as this would be the best thing to do. Everyone would then be able to get super-doooper-high-speed internet, as opposed to this nonsense we have at the moment.

Broadband should be subsidised for those who are still using dialup but find the installation costs of broadband too costly.

Yours Truly,
Douglas Carrison
