Subject: TRIM: Rural broadband

Give Rural and ALL Aussies a go...
We haven't had much spent on us for years... & are really falling behind the world...

1. Go Spend the Money on FTTN, ONLY If it goes to country towns too, not just country cities!
3. BUT, KEEP THE OWNERSHIP IN PUBLIC HANDS, you're spending OUR Money!
3. Rent access to Private Corp. Aren't Monopolies ILLEGAL!
4. Give ACCC real Power for fairness to the PEOPLE.

Reasoning...

- a. We already have the Huge example of CDMA -> Next G,
ie. it does NOT have the range, just bigger bandwidth = more Money for Monopoly Telstra
- b. ADSL2+ only available from Telstra = ridiculous included data + Monopoly Telstra again
- c. etc. etc.

Don't make the same stupid mistakes again...
Monopolies do Exactly what THEY Want!
It's Our Money, Not Yours & Not Telstra's
Keep what's in the ground OURS, ie, the Copper AND the Fibre
Don't you DARE shut down that copper,
It is wise redundancy, & that's the basics of ANY Network!

Haven't you all learnt yet!
Give the people back some faith in our Leaders again,
Get some of Solomon's WISDOM, & If you can't find any, then...
US ORDINARY AUSTRALIANS HAVE IT, IN BUCKET LOADS! OK!

Make us proud of our Leaders again,
Get some Balls, & make us the Lucky Country once again,

Always In Australia's Interests...
